NFU Energy - Sustainability statement

At NFU Energy, sustainability is at the heart of what we do. We are committed to supporting a more sustainable future by reducing our environmental impact and transition towards cleaner, more sustainable energy solutions.

We encourage the efficient use of energy, water and materials, promoting waste reduction, reuse and recycling wherever practicable. Compliance with applicable environmental legislation and regulatory requirements remains a key priority, alongside supporting our clients in maintaining compliance and implementing effective environmental management practices.

Our commitment to maintaining high standards is demonstrated through our certification to three internationally recognised standards: ISO 9001 (Quality Management Systems), ISO 45001 (Occupational Health and Safety Management Systems) and ISO 14001 (Environmental Management Systems).

Through ongoing review and continual improvement, we strive to enhance our sustainability performance, identify opportunities to reduce environmental impacts and integrate sustainable practices into our everyday business activities.
